

Next Generation Countertop Powerhouse | VX 520

VX Evolution is the platform to rely on for years to come. The VX 520 delivers unprecedented performance, mission-critical features and more of everything you want in a countertop payment device. More revenue opportunities. Flexible connectivity. Uncompromised security and dependability. All on the proven VX platform.

Proven, Popular Platform — Evolved For Today

- Powered by the Verix operating system for backward compatibility, eliminating retraining for sales, support and deployment

Unparalleled Features Deliver Next Level Performance

- A memory increase of 160 MB standard and the industry's fastest processor to move more transactions and deliver greater profits
- Optional integrated contactless reader plus multiple connectivity options: Dial, Ethernet and GPRS

Reassuring Confidence From Full Spectrum Security

- PCI PED 2.0 comes standard (PCI PTS 3.0 optional), plus end to end encryption with VeriShield Protect

Superior Value From Extended Life Design

- Longer-life components minimize repair and prolong field life
- Metal dome keypad plus landed smart card reader for improved life expectancy
